Ownership & Authority: Business Owners, Branch Managers, and Operations Directors.

Table of Contents

This operations manual covers every administrative feature, setting, and resource in the Amiga Gracia system.

CHAPTER 1: ARCHITECTURE & SECURITY

1.1 Admin Platform & Architecture Overview	3
1.2 Accessing the Dashboard & Security Protocols	3
1.3 Notification Center & Live System Alerts	3

CHAPTER 2: USER & STAFF GOVERNANCE

2.1 Role Hierarchy: Admin (Owner) vs Super Admin	4
2.2 Staff Account Creation & Granular Permissions	4
2.3 Staff Login Histories & Audit Trail	4
2.4 Mobile APK Users Management	4

CHAPTER 3: BOOKINGS & MANIFESTS

3.1 Master Bookings Register & Live Filtering	5
3.2 Passenger Manifests & Discount ID Review	5
3.3 Rolling Cargo Manifests (Vehicle RoRo)	5
3.4 Exporting Manifests (Coast Guard PDF/CSV)	5

CHAPTER 4: PAYMENT VERIFICATION & PROOFS

4.1 Proof of Payment Center (ManageProofs)	6
4.2 5-Point Proof Verification Protocol	6
4.3 Approving & Rejecting Transactions	6
4.4 Automated 30-Day Storage Pruning Rules	6

CHAPTER 5: TICKETS & RECEIPTS

5.1 Automated Ferry E-Ticket Generation	7
5.2 Airline Confirmation PDF Uploads	7
5.3 Single-Passenger Boarding Passes	7
5.4 Automated E-Ticket Delivery & Printing	7

CHAPTER 6: TRANSPORT MASTER DATA

6.1 Route Management (Ferry & Flight Paths)	8
6.2 Vessel & Aircraft Fleet Registry	8
6.3 Accommodation Classes (Economy to Suite)	8
6.4 Airline Baggage Rules & Rolling Cargo Rates	8

CHAPTER 7: SCHEDULE MANAGEMENT

7.1 Managing Schedules & Departures	9
7.2 The Schedule Import Center	9
7.3 Step-by-Step Automated Ingestion	9
7.4 Modifying & Cancelling Existing Schedules	9

CHAPTER 8: REBOOKINGS & REFUNDS

8.1 Rebooking Center & Fare Differences	10
8.2 Refund & Disbursement Center	10
8.3 Emergency Weather Disruptions (Coast Guard)	10

CHAPTER 9: VOUCHERS, COINS & DISCOUNTS

9.1 The Voucher & Promo Codes Engine	11
9.2 Gracia Coins Loyalty Rewards System	11
9.3 Statutory Discounts (Senior, PWD & Student)	11
9.4 Tour Packages & Partner Accommodations	11

CHAPTER 10: WEBSITE CMS & SETTINGS

10.1 The Live Website Customizer (CMS)	12
10.2 Payment Gateway Settings (Bank Accounts)	12
10.3 Broadcast App Push Notifications	12
10.4 Customer Inquiry Resolution Center	12

CHAPTER 11: FINANCIAL AUDITS & REPORTS

11.1 Overall Business & Financial Reports	13
11.2 Staff Performance Analytics Leaderboard	13
11.3 My Page & Personal Shift Reconciliation	13
11.4 End-of-Day Balancing Protocol	13

CHAPTER 12: TROUBLESHOOTING & OPS

12.1 System Diagnostic Endpoints	14
12.2 Storage Symlinks & File Permissions	14
12.3 Complete Status Master Dictionary	14

Chapter 1: Admin System Architecture & Security Governance

1.1 Platform Architecture Overview

The Amiga Gracia Travel Services administrator portal operates on Laravel 11 and Filament 3. It serves as the unified operational core connecting our customer website, customer Android APK, and ticketing counters into one centralized MySQL database.

1.2 Accessing the Dashboard & Operational Security

Step 1 Admin Portal Login: Open a web browser and navigate to <https://www.amigagracia.com/admin>. Enter your authorized administrator email and password, then click **Sign in**.

Step 2 The Executive Dashboard: Upon authentication, you enter the **System Dashboard** featuring four real-time KPI monitors:

- **Gross Sales Today & Month-to-Date:** Real-time peso revenue from confirmed tickets across sea, air, and tour packages.
- **Active Passenger Count:** Total travelers booked on upcoming voyages and flights.
- **Pending Payment Proofs Counter:** Immediate counter showing unverified customer payment receipts awaiting review.
- **Operator Volume Breakdown:** Interactive charts comparing passenger bookings across Starlite Ferries, 2GO Travel, Cebu Pacific, PAL, and AirAsia.

[ADMINISTRATOR SECURITY MANDATE]
Always log out before leaving your workstation. The admin portal automatically logs session IDs, user credentials, IP addresses, and exact timestamps for every sensitive action (including payment approvals, schedule deletions, and refund disbursements).

1.3 Notification Center & Real-Time Alerts

Located in the top-right header, the **Notification Bell** provides instant operational alerts:

- **New Booking Alerts:** Triggers immediately when a customer submits a booking online or via the mobile app.
- **Payment Proof Submissions:** Displays uploaded GCash, Maya, or bank transfer receipts needing approval.
- **Rebooking & Cancellation Notices:** Alerts staff to customer schedule change requests or refund filings.
- **Action Tools:** Click on any alert to jump directly to the relevant record, or use *Mark All as Read*.

Chapter 2: User Administration & Granular Permissions

2.1 The User Role Hierarchy

Amiga Gracia implements a role-based access control (RBAC) model to ensure strict operational segregation of duties:

Role	Target Position	Operational Scope & Responsibilities
Super Admin	Lead IT & System Architect	Technical administration: server diagnostics, raw database backups, system error tracing, and infrastructure health checks.
Admin	Business Owner, Branch Manager, Operations Head	Full executive authority: managing staff accounts, setting prices, configuring payment accounts, approving refunds, and publishing tour packages.
Staff	Ticketing Clerks, Front-Desk Agents, Customer Support	Operational execution: verifying payments, viewing manifests, handling walk-in bookings, and processing rebookings according to granted permissions.
Finance	Accountants, Bookkeepers	Financial auditing: Overall Reports, transaction reconciliations, payment audit logs, and refund disbursement verification.

2.2 Creating Staff Accounts & Granular Permissions

Located at **Administration → Staff Accounts**, administrators create, update, or deactivate employee logins:

Step 1

Click the **New Staff Account** button in the upper-right corner.

Step 2

Enter the employee's **Full Legal Name**, corporate **Email Address**, and initial **Password**.

Step 3

Select the Role as **Staff**. The *Granular Permissions Matrix* will display 8 functional groups:

- **Bookings:** Allows viewing booking records and transaction manifests.
- **Proofs:** Grants access to the Proof of Payment verification screen.
- **Schedules & Routes:** Permits viewing timetables and vessel departures.
- **Refunds:** Enables reviewing and processing passenger ticket refund requests.
- **Inquiries:** Allows reading and answering customer support contact tickets.

Step 4

Save the account. The staff member can now log in immediately with their credentials.

2.3 Staff Login Histories & Audit Trail

Inside every staff member's profile, administrators can inspect the **Login Histories** tab. This displays a complete chronological log of every successful login, recorded IP address, browser user-agent, and session duration for complete accountability.

2.4 Mobile APK Users Management (`ApkUserResource`)

Located at **Administration → Mobile APK Users**, this screen manages customers who have registered an account via the Android mobile app:

- **Customer Data:** View traveler names, verified email addresses, mobile numbers, and date registered.
- **Loyalty Balance:** View the customer's current **Gracia Points** wallet balance and redemption history.
- **Referral Tracking:** Inspect the customer's unique Referral Code and see which new travelers they invited.
- **Account Status:** Verify whether the customer has completed email OTP verification.

Chapter 3: Master Booking & Passenger Manifest Operations

3.1 The Master Bookings Register

Located at **Bookings → Bookings**, this is the operational command center for all passenger reservations made across Web, Mobile App, and Front-Desk channels.

Powerful Real-Time Search & Filter Tools:

- **Transaction Number Search:** Instantly locate any booking using its unique code (e.g. AGT-2026-10048).
- **Client Search:** Search by passenger full name, primary booker email address, or contact phone number.
- **Status Filtering:** Filter live views by status: **PENDING**, **CONFIRMED**, **CANCELLED**, **REBOOKED**, **REFUNDED**, or **DISRUPTED**.
- **Operator & Route Filter:** View bookings specifically for *Starlite Ferries*, *2GO Travel*, *Cebu Pacific*, *PAL*, or *AirAsia*.

3.2 Passenger Manifest & Discount ID Review

Clicking **View** on any booking opens the comprehensive **Passenger Manifest**:

Passenger Details Breakdown:

Lists every traveler under the booking, including legal full name, gender, date of birth, age classification (Adult, Child, Infant), and assigned seat or cabin number.

Special Statutory Discounts:

If a 20% discount was claimed for a **Senior Citizen, PWD, or Student**, administrators can view the uploaded photo of their government ID card to confirm legal discount qualification before issuing the final ticket.

Airline Baggage Allowance:

Displays the baggage weight purchased for each passenger (e.g., Free 7kg Carry-on, 20kg Standard Check-in, or 32kg Heavy Baggage).

3.3 Rolling Cargo Manifests (Vehicle RoRo Freight)

When travelers take their vehicles on sea ferries, vehicle details are tied directly to the booking:

- **Vehicle Specifications:** Displays Vehicle Brand (e.g., *Toyota*), Model (*Fortuner*), and official **Plate Number**.
- **Freight Classification:** Shows the assigned freight class (e.g. Class 2 SUV) and the vehicle shipping fee collected.
- **Driver Identification:** Confirms which passenger on the manifest is designated as the certified driver.

3.4 Exporting Manifests (Coast Guard & Port Authorities)

Philippine maritime regulations require submitting official passenger and cargo manifests to the **Philippine Coast Guard (PCG)** and port terminal operators prior to vessel departure:

Export Option	Use Case & Recipient
Export Manifest PDF	Generates a clean, printable official passenger manifest formatted to maritime inspection standards for the Coast Guard and vessel captain.
Export Manifest CSV / Excel	Downloads spreadsheet data containing all booking financial totals, passenger demographic details, and operator commissions for accounting and tax audits.
Direct Print	Sends the formatted manifest directly to terminal ticket office printers for immediate physical stamping and filing.

Chapter 4: Payment Verification & Proof Management

4.1 The Payment Proof Center (`ManageProofs`)

Located at **Reports → Proof of Payment**, this critical module handles customer payment receipt verification for GCash, Maya, and manual bank transfers.

4.2 The 5-Point Payment Verification Protocol

To protect the business against forged screenshots, edited transaction numbers, or duplicate receipts, all staff and administrators must enforce this strict 5-point protocol:

- Point 1

Screenshot Authenticity Inspection

Inspect the uploaded image closely. Verify it is a genuine, uncropped transaction receipt from GCash, Maya, or an authorized online banking app. Beware of blurry fonts or cut-off reference numbers.
- Point 2

Recipient Account Confirmation

Verify that the payment was transferred to the official Amiga Gracia Travel Services corporate GCash number, Maya merchant QR, or registered company bank account.
- Point 3

Exact Amount Reconciliation

The receipt total must match the required booking price down to the exact centavo. Never approve partial payments or short amounts.
- Point 4

Payment Timestamp Verification

Check the date and time on the payment receipt. It must coincide with the booking time window. This prevents customers from submitting receipts from old trips.
- Point 5

Merchant SMS / App Inbox Cross-Check

When handling high-value bookings or unfamiliar customers, cross-reference the transaction reference number with your branch's official merchant SMS inbox or online banking portal.

4.3 Approving & Rejecting Transactions

- Approving a Transaction:** Click the green **Verify & Confirm** button. The system immediately updates the booking status to **CONFIRMED**, updates seat inventories, credits the customer's Gracia Points, and triggers automated email delivery of their official E-Ticket PDF.
- Rejecting an Invalid Receipt:** Click **Reject Payment**. You will be prompted to type an internal explanation (e.g., *"Reference number not found in bank logs"* or *"Short payment: ₱500 balance remaining"*). The customer is notified to re-upload proof.

4.4 Server Storage Protection: Proof Retention Rules

High-resolution payment screenshots can rapidly consume server storage over time. On the **Manage Proofs** page, administrators can configure the **Proof Retention Days** parameter (default: 30 days). When enabled, proof image files older than 30 days are automatically pruned from the server disk, while all financial database records and transaction numbers remain permanently archived.

Chapter 5: Ticket Issuance & Airline Confirmation Integration

5.1 Automated Ferry E-Ticket Generation

For ferry voyages operated by **Starlite Ferries** and **2GO Travel**, the Amiga Gracia system automatically generates an official, standardized **E-Ticket & Travel Itinerary PDF**. It features the official corporate logo, voyage schedule, cabin assignment, passenger manifest, baggage rules, and an scannable QR boarding pass.

5.2 Custom Commercial Airline Confirmation PDF Uploads

Commercial airlines (such as *Cebu Pacific*, *Philippine Airlines*, and *AirAsia*) operate on centralized global distribution systems (GDS) and issue official airline booking confirmations featuring proprietary Passenger Name Record (PNR) barcodes.

How to Attach Official Airline PDFs:

- Step 1** Locate the confirmed airline transaction under **Bookings → Receipts & Tickets**.
- Step 2** In the **Custom Airline Confirmation PDF** field, click upload and attach the official e-ticket document downloaded from the airline partner portal.
- Step 3** Alternatively, if the airline provides an online check-in link, enter it into the **Official Airline Confirmation URL** field.
- Step 4** Save the record. When the customer taps *Download Ticket* on their website account or mobile app, the system will seamlessly deliver this official airline document directly to their phone!

5.3 Single-Passenger Boarding Passes

For group bookings (e.g. 5 passengers under 1 transaction), the system allows generating individual single-passenger boarding pass PDFs via `/ticket/passenger/{passenger_id}`. This allows family members or corporate travelers to hold their own personalized boarding pass displaying their individual seat number.

5.4 Automated E-Ticket Customer Delivery

Upon payment verification, the system executes an automated multi-channel delivery sequence:

- **Automated Transactional Email:** Dispatches the official itinerary PDF as an email attachment via SendGrid or SMTP.
- **Web Customer Portal:** The ticket becomes immediately downloadable in the customer's *My Bookings* dashboard.
- **Mobile Flutter App:** The Android app refreshes automatically, displaying the trip under *Active Trips* with offline PDF caching.

TICKET PRINTING REQUIREMENT

Passengers traveling on sea voyages or commercial flights must bring a **printed physical copy of their E-Ticket itinerary** to present at the port terminal or airport check-in counter along with valid government IDs.

Chapter 6: Transport Master Data Management

6.1 Travel Route Management (`FerryRouteResource`)

Located at **Transport Master Data → Routes**, administrators define the Philippine travel network:

- **Origin & Destination Ports:** Set departure and arrival terminals (e.g. *Batangas Pier → Calapan Port*; *Manila NAIA → Caticlan Boracay*).
- **Transport Mode:** Categorize routes as **Ferry** or **Airline**.
- **Distance & Duration:** Set estimated voyage or flight hours to provide accurate arrival estimates on passenger itineraries.
- **Active Toggle:** Temporarily deactivate seasonal routes with a single click without deleting historical records.

6.2 Vessel & Aircraft Fleet Registry (`VehicleResource`)

Located at **Transport Master Data → Vehicles / Vessels**, this module registers the physical fleet:

- **Ship / Plane Name:** Register vessel names (e.g. *MV Starlite Eagle*, *MV 2GO Maligaya*) or aircraft (*Airbus A320-200*, *ATR 72-600*).
- **Operator Mapping:** Assign each vehicle to its licensed operator (Starlite, 2GO, PAL, Cebu Pacific, AirAsia).
- **Capacity Limits:** Set passenger capacity and cargo tonnage limits to prevent overbooking.

6.3 Accommodations & Cabin Classes (`TransportClassResource`)

Located under **Transport Master Data → Accommodations / Classes**, administrators define comfort tiers:

Accommodation	Vessel / Flight Type	Description & Amenities
Economy Open-Air Cot	RoPax Ferry Vessels	Bunk beds located on open-air sheltered decks with fresh sea breeze. Most affordable budget option.
Tourist Aircon Cabin	Fastcraft & Ferries	Enclosed, fully air-conditioned dormitory cabins with bunk beds, charging outlets, and clean bedding.
Cabin / Stateroom	Cruise Ferries (2GO / Starlite)	Private 2-person or 4-person room with private bathroom, television, and linens. Ideal for families.
Suite Class	Premium Vessels	Luxury accommodations featuring queen bed, private living area, mini-fridge, and priority boarding.
Airline Economy / Seat	Commercial Aircraft	Standard domestic flight seating with complimentary 7kg carry-on baggage allowance.

6.4 Airline Baggage Rules & Rolling Cargo Freight (RoRo)

- **Baggage Settings (`AirlineBaggageRuleResource`):** Configure standard check-in tier (₱850 for 20kg), heavy tier (₱1,400 for 32kg), and excess weight per-kg surcharges.
- **Vehicle Rates & Brands (`VehicleRateResource` , `VehicleBrandResource`):** Manages RoRo freight across 5 classes: Class 1 (Motorcycles), Class 2 (Sedans/Compact SUVs), Class 3 (Pickups/Large SUVs/Vans), Class 4 (Buses/Light Trucks), Class 5 (Heavy 10-Wheelers).

Chapter 7: Schedule Management & Bulk Timetable Importer

7.1 Managing Schedules & Departures

Located under **Travel & Tours** → **Schedules**, administrators create individual sailings and flight departures, defining departure time, arrival time, vessel assignment, available seats per accommodation tier, and base fares.

7.2 The Schedule Import Center (`ImportSchedules`)

Entering hundreds of recurring trips manually is time-consuming. The **Schedule Import Center** offers two automated batch solutions:

Import Method	Procedure & Operational Benefits
Automated Timetable Ingestion (Starlite)	Select "Starlite" from the operator list, pick a date range (e.g. Next 60 Days), and click Run Automated Ingestion . The system populates all active ferry sailings, vessel assignments, departure/arrival hours, and pricing tiers in seconds!
Excel / CSV Bulk Upload (Airlines & 2GO)	Download the standard spreadsheet template, input flight/voyage numbers, departure/arrival hours, and base fares. Upload the file to register the entire schedule into the live booking engine.

7.3 Step-by-Step Guide: Executing Automated Ingestion

- Step 1** Open **Travel & Tours** → **Import Schedules** in the sidebar.
- Step 2** Choose **Starlite Ferries** from the Operator dropdown menu.
- Step 3** Specify the **Date Range** (e.g., from 2026-09-01 to 2026-10-31).
- Step 4** Click **Start Automated Ingestion**. The system connects to the timetable repository, verifies vessel availability, and writes all scheduled sailings into the database without creating duplicates.

7.4 Modifying & Cancelling Existing Schedules

When sea conditions or airline operations change:

- **Delaying a Departure:** Open the schedule record, edit the departure and arrival times, and save. The website and mobile app will update instantly.
- **Seat Inventory Adjustments:** Modify the remaining seat quotas per accommodation class if an operator reserves seats for group charters.
- **Schedule Deactivation:** Toggle the *Is Active* switch to hide the voyage from online customer searches while preserving past bookings.

Chapter 8: Rebookings, Refunds & Emergency Disruptions

8.1 The Rebooking Management Center (`ManageRebookings`)

When travelers request date or voyage changes, their files flow into **Bookings → Rebookings**:

- **Inspect Original vs. New Schedule:** The admin sees the passenger's current departure schedule side-by-side with their newly requested schedule.
- **Automated Fare Difference Computation:** If the new schedule has a higher base fare or peak season surcharge, the system computes the exact difference plus any rebooking fee.
- **Confirming Rebooking:** Once the customer pays the difference, clicking *Confirm Rebooking* updates the passenger manifest, recalculates seat inventories, and generates a newly updated **REBOOKED** E-Ticket.

8.2 The Refund & Disbursement Center (`ManageRefunds`)

Located at **Bookings → Refunds**, ticket cancellations are processed with complete financial rigor:

- Step 1 Review Cancellation Request:** Inspect the passenger's reason for cancellation (e.g. personal emergency, change of plans) and the original amount paid.
- Step 2 Automatic Cancellation Penalty Deduction:** The system applies the operator's cancellation penalty (e.g. 20% cancellation fee) and displays the exact **Net Refund Amount** to be returned to the traveler.
- Step 3 Disbursing the Funds:** The finance officer transfers the refund to the customer's nominated GCash, Maya, or bank account.
- Step 4 Attaching Disbursement Proof:** Enter the bank transaction number and upload a screenshot of the payout receipt.
- Step 5 Completion & Official E-Refund PDF:** Clicking *Mark as Refunded* automatically generates and emails an official **E-Refund Acknowledgement PDF** with status updated to **REFUNDED**.

8.3 Emergency Service Disruptions & Weather Cancellations

During severe weather (typhoon signal warnings from PAGASA or Coast Guard gale warnings), ferry trips and flights are grounded. The **Travel & Tours → Service Cancellations** module manages these crises smoothly:

[FORCE MAJEURE / WEATHER CANCELLATION PROTOCOL]

1. **Declare Cancelled Voyage:** Select the affected route, operator, and date. Mark the status as *Weather Cancellation (Force Majeure)*.
2. **Link Replacement Schedules:** Administrators select alternate future schedules (e.g. the morning sailing once the storm clears) as designated *Replacement Schedules*.
3. **Automated Passenger Alerts:** All affected passengers receive push notifications and emails informing them that their voyage was grounded due to weather.
4. **Zero-Fee Transfer:** Affected travelers can open their mobile app or website account and transfer their tickets to any linked replacement voyage with **100% waived rebooking fees!** Status updates to **DISRUPTED**.

Chapter 9: Vouchers, Gracia Coins, Discounts & Tour Packages

9.1 The Voucher & Promo Codes Engine (`VoucherResource`)

Located at **Travel → Vouchers**, administrators create, schedule, and govern marketing coupon promotions across all booking channels:

- **Discount Types & Ceiling Caps:** Choose between **Percentage** (e.g. 10% or 20% off) or **Fixed Amount** (e.g. ₱200 or ₱500 off). Set an optional **Maximum Discount** cap (`max_discount`) to protect profits on large bookings.
- **Eligibility Thresholds & Quotas:** Define **Minimum Booking Amount** (e.g., min ₱1,500 spend required) and global **Total Usage Limit** (e.g., first 200 redemptions only).
- **Fraud Prevention (One-Use Rule):** Toggle **One Use per Customer** (`one_use_per_customer`) to prevent the same user account from repeatedly redeeming the code.
- **Targeted Operator & Route Scope:** Restrict vouchers to specific operators (e.g., Starlite Ferries or 2GO only) or designated origin/destination ports.
- **Hidden Vouchers & Anti-Stacking Policy:** Mark vouchers as `is_hidden` for targeted VIP email campaigns. The system strictly forbids stacking vouchers with Super Promotional tickets (`VoucherService`).

9.2 The Gracia Coins Loyalty Rewards System (`GraciaEarningRuleResource`)

Amiga Gracia features a closed-loop loyalty currency—**Gracia Coins (Gracia Points)**—governed under **Settings → Gracia Rules**:

- **Coin Economy: 1 Gracia Coin = ₱1.00 direct checkout discount.** Coins never expire and cannot be redeemed for physical cash.
- **Configuring Earning Rules:** Administrators set spend thresholds (e.g. award **10 Gracia Coins** for every **₱100 spent**). Upon booking confirmation, the engine automatically credits coins to the traveler's digital balance.
- **Ledger Audit Trail (`GraciaPointLedger`):** Every coin earned, redeemed, or adjusted is permanently recorded with member ID, booking reference, entry type, qualifying spend, and idempotency key.
- **Referral Program Bonuses:** Mobile app users can share their unique Referral Code. When a referred traveler registers and books, **both users earn bonus Gracia Coins!**

9.3 Philippine Statutory Discounts Administration (`DiscountResource`)

Located at **Travel → Discounts**, administrators maintain legal compliance with mandatory Philippine discount legislation:

Beneficiary	Governing Law	Mandated Computation Formula & ID Requirement
Senior Citizens	RA 9994 (Senior Citizens Act)	20% discount on gross fare + 12% VAT exemption: $\text{Net Fare} = (\text{Gross} \times 0.80) / 1.12$. Requires valid OSCA ID.
Persons with Disabilities	RA 10754 (PWD Act)	20% statutory fare discount: Deducted from regular passenger ticket base fare. Requires official government PWD ID.
Students	RA 11314 (Student Fare Act)	20% domestic travel discount: Applies to active basic and higher education students. Requires validated School ID.

9.4 Tour Packages & Partner Accommodations (`TourResource` , `HotelResource`)

Publish curated Philippine island vacation packages (Coron, Boracay, El Nido, Bohol) under **Travel & Tours → Tour Packages**, bundling ferry/flight departures with partner hotel room inventories and island hopping tours.

Chapter 10: Website Content Management (CMS) & System Settings

10.1 The Live Website Customizer (`ManageWebsiteSettings`)

The **Manage Website Settings** page gives administrators complete CMS control over public website pages without writing a single line of code:

- **Header & Navigation:** Update the company logo, emergency hotlines, email contacts, and navigation menu links.
- **Homepage Hero Slider:** Upload high-definition banner images for seasonal travel promotions and set custom headline banners.
- **Booking Cards:** Customize the featured destination cards on the homepage (e.g., Coron, El Nido, Boracay, Calapan).
- **About Us & Services:** Update company background history, mission statement, and service descriptions.
- **FAQs Management:** Add, edit, or reorder frequently asked questions and answers.
- **Footer & Social Media:** Update office address, copyright text, Facebook page URL, and customer service email.

10.2 Payment Gateway Settings (`ManagePaymentSettings`)

Located at **Settings → Payment Settings**, administrators configure payment accounts displayed to customers during checkout:

E-Wallet Channels:

- **GCash QR Code:** Upload official GCash merchant QR.
- **Maya QR Code:** Upload company Maya merchant QR.
- **Merchant Mobile Numbers:** Set corporate transfer numbers.

Bank Accounts:

- **Bank Name:** BDO, BPI, Landbank, Metrobank.
- **Account Name:** Amiga Gracia Travel Services.
- **Account Number:** Official corporate checking number.

10.3 Broadcast App Push Notifications (`AppNotificationResource`)

Under **Settings → App Notifications**, administrators compose and broadcast instant push notifications directly to travelers' smartphones (e.g. "*Super Seat Sale: 50% Off Boracay Flights This Weekend!*") via Firebase Cloud Messaging (FCM).

10.4 Customer Inquiry Resolution Center (`InquiryResource`)

Under **Administration → Inquiries**, administrators review and respond to incoming customer messages submitted through the website contact form or mobile app, tracking tickets until fully resolved.

Chapter 11: Financial Audits, Overall Reports & Staff Performance

11.1 Overall Business & Financial Reports (`OverallReports`)

Found under **Reports → Overall Reports**, this provides executive business intelligence:

Report Metric	Operational Meaning
Gross Ticket Sales	Total revenue collected across all travel modes (Ferries, Flights, Tour Packages, and Cargo).
Operator Commissions	Itemized breakdown of ticketing commissions due from Starlite, 2GO, Cebu Pacific, PAL, and AirAsia.
Net Payouts & Refunds	Total funds disbursed for ticket cancellations and passenger refunds.
Export Tools	Download complete audited reports in PDF (for executive reviews), CSV / Excel (for accounting spreadsheets), or send to Print .

11.2 Staff Performance Analytics Leaderboard (`StaffPerformance`)

Found under **Reports → Staff Performance**, this module tracks employee productivity across custom date ranges:

Productivity Metrics:

- Total payment proofs verified per employee.
- Total bookings successfully issued.
- Average verification turnaround time per shift.

Sales Leaderboard:

- Gross sales revenue generated per employee.
- Leaderboard ranking top-performing ticketing agents.
- Invaluable tool for monthly performance bonuses.

11.3 My Page & Personal Shift Reconciliation (`MyPage`)

Every administrator and staff member has a personalized dashboard at **My Account → My Page & Reports**. It lists every transaction personally handled during your shift, enabling seamless evening cash drawer reconciliation.

11.4 End-of-Day Balancing Protocol

Step 1 Open **My Account → My Page & Reports**. Filter transactions for "Today".

Step 2 Tally cash on hand against total payments recorded as "Cash" in the shift manifest.

Step 3 Cross-reference GCash, Maya, and Bank transfer totals against bank merchant receipts.

Step 4 Export the shift summary report to PDF, sign off, and file with the Branch Manager.

Chapter 12: Admin Troubleshooting & System Maintenance

12.1 System Diagnostic Endpoints

Super Admins and IT staff can monitor server health using built-in diagnostic routes:

- `/health-check` : Verifies PHP version, database connectivity, cache driver, SendGrid mailer, and Firebase credentials.
- `/queue-status` : Inspects background asynchronous queue jobs (email sending and PDF generation).
- `/db-test` : Tests raw database latency, active table counts, and connection pools.

12.2 Storage Symlinks & File Permissions

If uploaded receipts or e-ticket PDFs fail to display, ensure the public storage symlink is active by running:

```
php artisan storage:link
```

12.3 Complete Status Master Dictionary

All operational statuses across bookings, rebookings, refunds, and tickets are strictly defined below:

Status	Indicator	Meaning & Required Operational Action
Pending	PENDING	Booking created, waiting for payment screenshot verification. Customer should ensure receipt was uploaded.
Confirmed	CONFIRMED	Payment successfully verified! Seat/cabin is guaranteed. Passenger can download and use their official E-Ticket.
Cancelled	CANCELLED	Trip cancelled by traveler or payment rejected as fraudulent/unpaid. Ticket is void.
Rebooked	REBOOKED	Travel date, vessel, or seat class was updated. Use the newly issued updated itinerary.
Refunded	REFUNDED	Booking cancelled and funds disbursed to customer's GCash or bank account. E-Refund PDF issued.
Disrupted	DISRUPTED	Voyage/flight suspended by operator or Coast Guard due to weather. Passenger eligible for free replacement trip or full refund.
